Care

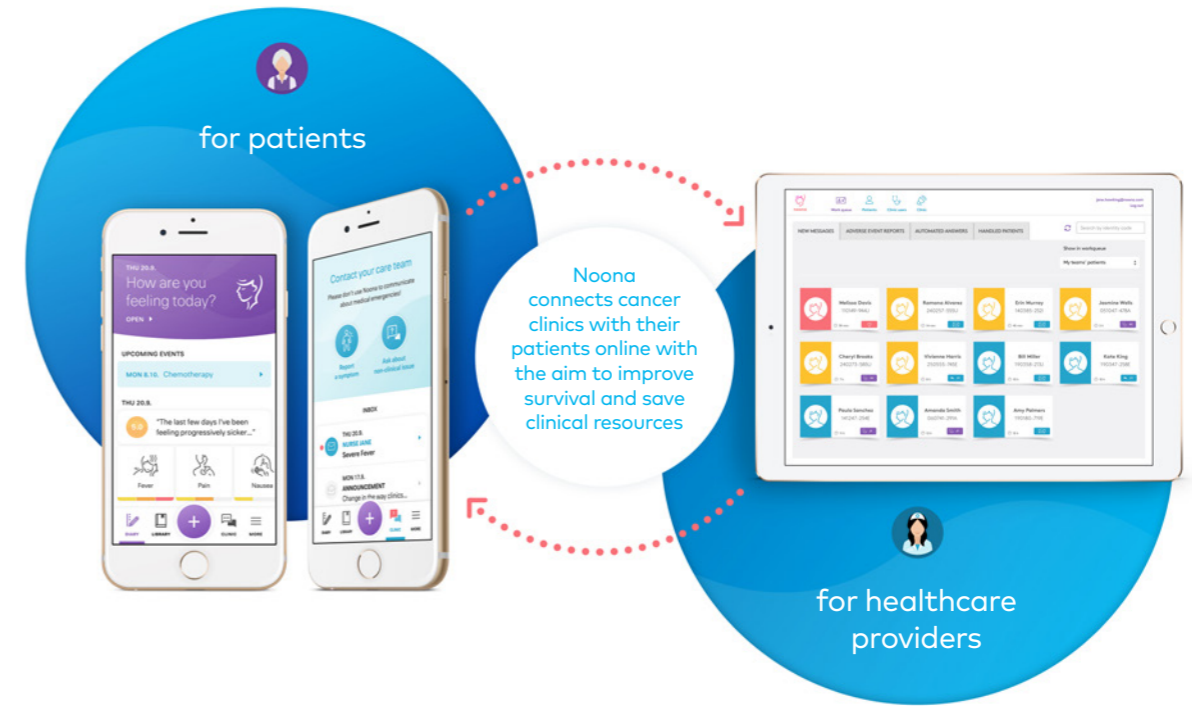

Improve your patients' well-being with the Noona® software application.

Noona is a cloud-based patient-reported outcomes (PRO) solution from Varian that captures structured, real-time symptom information and helps the care team prioritize patients based on symptom severity.

Give your patients peace of mind and fast access to care when it's needed.

For patients, Noona's intuitive user interface can be accessed on any device with a web browser or through its native iPhone® or Android™ app. Patients can use Noona to:

- Securely and conveniently message the healthcare team
- Report symptoms directly to the healthcare team and receive feedback
- Respond to symptom questionnaires
- Maintain a diary to track their well-being

For the care team, Noona incorporates state-of-the-art machine learning algorithms to help prioritize patient care. With Noona, care teams can:

- Stay informed on patient health concerns
- Follow up on critical results between regularly scheduled visits
- Identify and tailor treatments quickly
- Improve patient-clinic communications
- Reduce workload with a more efficient communication tool

Noona is designed to support the everyday work of nurses and physicians in cancer care, helping to increase clinical efficiency and reduce workloads through comprehensive communication tools. Reported benefits include:

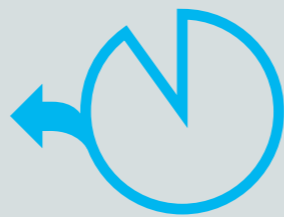

Time Savings

Nurses save up to 60 minutes of phone time per day

Resource Efficiency

Fewer ER visits as the care team can identify and treat symptoms earlier

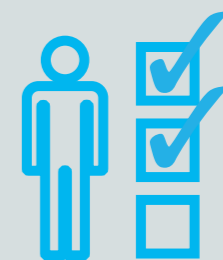

High Engagement

90 percent response rate for symptom questionnaires

Intuitive App

Designed with direct input from patients. The average age of Noona patient users is 64 years old

Advance Real-World Evidence Studies

Structured symptom data can be used for clinical trials and improved decision-making

Designed to increase efficiency for oncology clinics

Noona treatment modules cover 90 percent of the most common cancer and therapy types, with each module adapted for the most relevant symptoms.

Noona lets patients actively engage with their cancer care team through treatment, recovery and post-treatment care, which can lead to improved outcomes and longer survivability.

Find out how Noona can easily integrate into your clinical workflows to help in the fight against cancer. Contact your Varian representative for more information.

Noona helps me to manage my fear and have hope. I will go through this as strongly as I can, knowing that I am not alone, my nurse is there for me.

— Prostate cancer patient, Finland

Noona is a low threshold service through which we receive a lot more information about a patient's well-being and are able to minimize complications that might occur at home.

— Chemotherapy nurse, U.S.

We reviewed 11 solutions but Noona was by far the best: the quality of the cancer-specific modules rigorously developed with real-world clinicians. The user interface is outstanding.

— Head care navigation, medical cancer center, U.S. network
