# cAutoVerify

Elevate
your workflow

Inspiring excellence in cancer treatment

C-RAD

A more efficient workflow saves **time for what really matters**

Using an automated workflow to minimize repetitive time-consuming tasks doesn't just save you and your team time, it also increases patient safety. We offer a complete automation solution for both the imaging suite and treatment room, automating patient identity validation and accessory tracking. To streamline the daily workflow within radiation therapy even further, cAutoVerify seamlessly integrates with the Record and Verify system.

Accessory Tracking

Device setup made easy

ALWAYS THE RIGHT ACCESSORIES

With cAutoVerify, you always validate the correct accessories, both patient specific and global.

SEAMLESS INTEGRATION

cAutoVerify automatically validates accessories, reporting directly to the Record and Verify system without any user intervention.

FAST AND RELIABLE

RFID tracking technology brings both speed and reliability to cAutoVerify, and enables completely contactless validation.

ADAPTS TO YOU – NOT THE OTHER WAY AROUND

cAutoVerify adapts seamlessly to your current workflow, streamlining operations, saving time and increasing efficiency whenever the opportunity arises.

Fast device setup

Instant ID validation

Patient Validation

Contactless patient identity validation
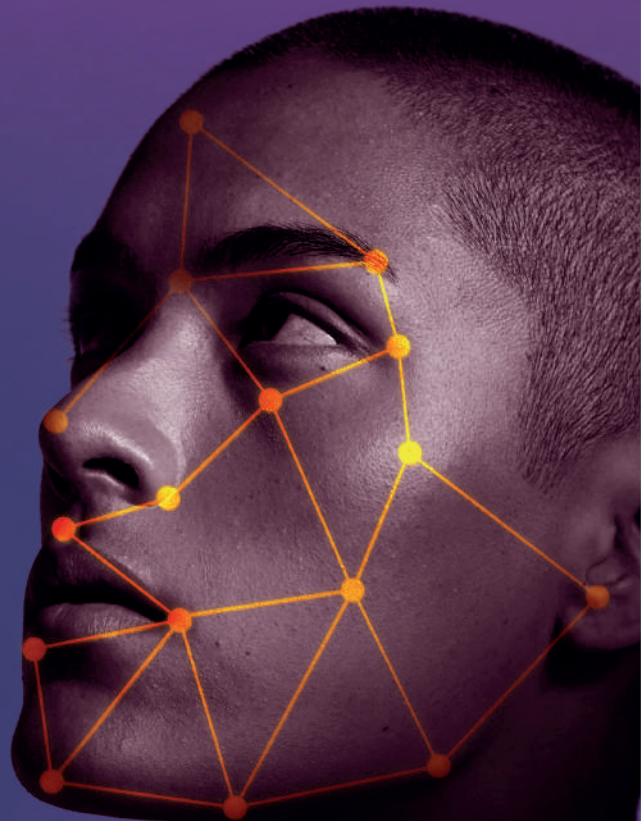

ALWAYS THE RIGHT PATIENT

cAutoVerify enhances safety via automation, so you always have the right patient for every treatment.
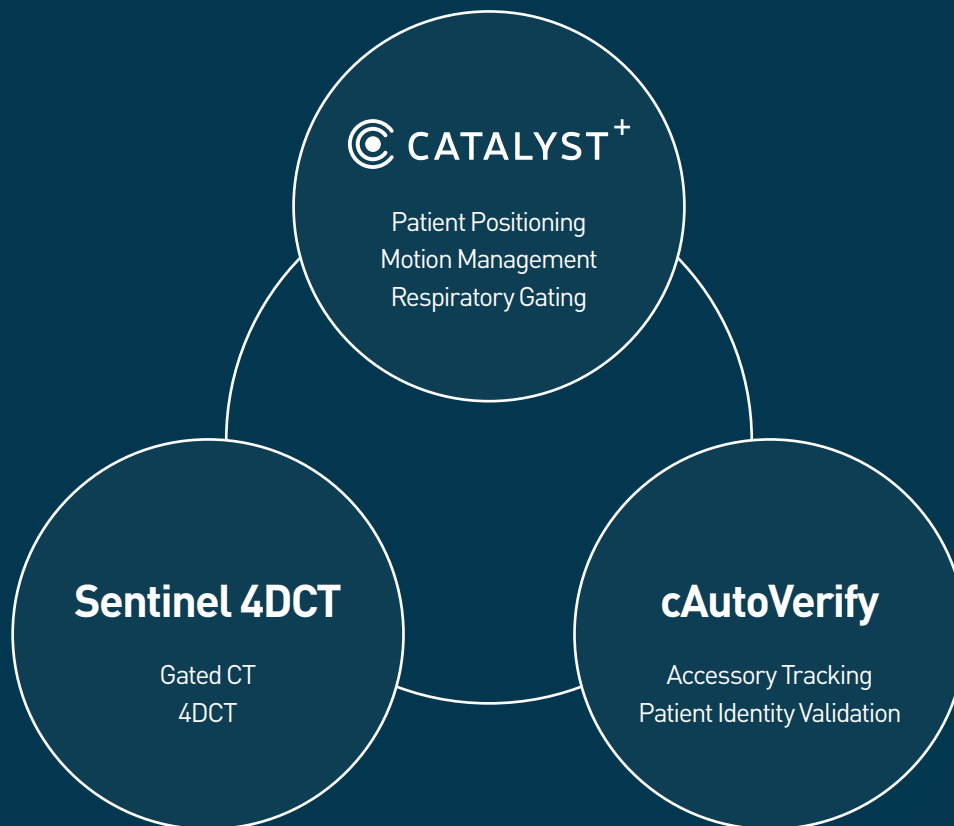

SEAMLESS INTEGRATION

cAutoVerify automatically validates patient identity, reporting directly to the Record and Verify system without any user intervention.

NEVER FORGETS A FACE

Biometrical facial recognition validates patient identity quickly, without contact, and to the highest level of safety.

Say hello to your **new dream team** in advanced radiation therapy
